SUBJECT: June 21, 2022 – Public Hearing
Adoption of Revisions to Orange County Code, Chapter 15,
Article III, Air Quality Control
(Related to Resolution Pertaining to a Fee Schedule for Asbestos
Removal Projects)

The Environmental Protection Division (EPD) is presenting proposed revisions to Orange County Code, Chapter 15, Article III, Air Quality Control Ordinance. This ordinance was last updated in 2019.

In 1985, Orange County was designated by the Florida Department of Environmental Protection (FDEP) as a "locally approved air program." The current Specific Operating Agreement (SOA) between the FDEP and the County was approved by the Board in February 2021. The SOA authorizes the County to act on behalf of the FDEP in matters relating to air pollution control and establishes the County's duties and responsibilities as a local air program. The SOA requires Orange County to keep the Air Quality Control Ordinance and the Air Quality Management (AQM) Program consistent with the FDEP's rules, programs and standards. Adherence to the SOA also makes Orange County eligible to receive funding to support the program in the form of a portion of the tag fee for every vehicle registered in the County as well as state and federal grants for local air programs that are awarded on an annual basis.

The AQM staff has reviewed changes in FDEP and U.S. Environmental Protection Agency (EPA) air pollution control rules that have occurred since the last time the Air Quality Control Ordinance was updated. A summary of FDEP and EPA rules changes that have occurred between the previous review that concluded on January 31, 2019 and the current review that was completed on January 31, 2022 is provided in tabular form and included as a reference. Based on this review, it was determined that only relatively minor changes to FDEP and EPA air rules have been promulgated, including clarifications, minor administrative changes and updating of references to reflect more current standards and methods. Most of the changes are non-substantive and will not significantly impact how the AQM program operates or regulates air quality. In addition, the changes to federal and state air rules are not expected to have a substantial impact

on the development of real property within Orange County. The proposed changes to the air ordinance reflect an updating of the dates of the FDEP and EPA rules adopted by reference to the versions as they exist on January 31, 2022.

EPD presented the draft ordinance revisions to the Environmental Protection Commission (EPC) on March 30, 2022 and the EPC voted unanimously to recommend approval of the proposed changes to the ordinance. EPD also presented the draft ordinance revisions at a stakeholder meeting on the evening of March 30, 2022; no adverse comments were received concerning the proposed revisions. In addition, the County Attorney's Office has reviewed the revised ordinance as to form.

ACTION REQUESTED: Determine that the Proposed Ordinance will not have a substantial impact on the development of real property within Orange County; and Adopt an Ordinance Pertaining to Air Quality and Air Pollution Control; Amending Section 15-70, Definitions; Amending Section 15-89.1, Air Pollution Prohibited; Amending Section 15-90, Adoption of State and Federal Rules by Reference; Amending Section 15-110, Inspection and Notification Fees; and Providing an Effective Date. 8/14/2019	Stationary Sources - Emission Standards Bulk Gasoline Plants	62-296	296.418	62-296 418(1)	Revision to Rule subsection 62-296 418(1), F.A.C. lists the affected counties subject to bulk gasoline plant work practices to reduce emissions of volatile organic compounds (VOC), instead of referencing Rule 62-204.340, F.A.C. The provisions of Rule 62-296 418, F.A.C., continue to remain in place to prevent backsliding increases of emissions of VOC.
8/14/2019	Stationary Sources - Emission Standards: Implementation of Federal Clean Air Interstate Rule	62-296	296.470	Entire rule	Rule 62-296 470, F.A.C., Implementation of the Federal Clean Air Interstate Rule was repealed because the Federal Clean Air Interstate Rule is no longer applicable as it has been replaced by the Cross-State Air Pollution Rule (CSAPR).
8/14/2019	Stationary Sources - Emission Standards, Reasonably Available Control Technology (RACT) - Volatile Organic Compounds (VOC) and Nitrogen Oxides (NOx) Emitting Facilities	62-296	296.500	62-296 500(1)(a) and (b)	Rule paragraphs 62-296 500(1)(a) and (b), F.A.C., revised to: -Include a clarification of what "existing" VOC-emitting facilities are, -Remove the references to "areas designated as air quality maintenance areas for ozone under Rule subsection 62-204.340, F.A.C." and simply list the counties in which the rules apply; and -Clarify what the rule citations 62-212.400 and 62-212.500 refer to, i.e., Prevention of Significant Deterioration and Preconstruction Review of Nonattainment Areas, respectively.
8/14/2019	Stationary Sources - Emission Standards, Cutback Asphalt	62-296	296.512	62-296 512(3)	Rule subsection 62-296 512(3), F.A.C., removed because it references a test method for particulate matter, a pollutant that is not regulated by Rule 62-296.512, F.A.C. The rule only controls emissions of volatile organic compounds from cutback asphalt plants.
8/14/2019	Stationary Sources - Emission Standards, Reasonably Available Control Technology (RACT) - Lead	62-296	296.600	62-296 600(1)	Rule subsection 62-296 600(1), F.A.C., was revised to replace a reference to the repealed Chapter 62-275, F.A.C., Air Quality Areas, with a specific description of the geographic area in Hillsborough County that was nonattainment for lead; and to clarify what is meant by an area of influence for the pollutant lead.
8/14/2019	Stationary Sources - Emission Standards, Reasonably Available Control Technology (RACT) Particulate Matter	62-296	296.700	62-296 700(1)(a)	Rule paragraph 62-296.700(1)(a), F.A.C., was revised by: clarifying rule citations; clarifying what is meant by an "existing" emissions unit; and clarifying what areas of the state the PM RACT rules apply to, i.e., the areas that were in PM (TSP) air quality maintenance areas and areas of influence (areas within 50 kilometers outside the boundary of an air quality maintenance area.)

The Clean Air Act (CAA or Act) requires that each state adopt and submit a SIP for the implementation, maintenance, and enforcement of each national ambient air quality standard (NAAQS) promulgated by EPA, commonly referred to as an "infrastructure SIP." This submission addresses certain greenhouse gas (GHG) Prevention of Significant Deterioration (PSD) permitting requirements for the 2008 and 1997 8-hour Ozone and the 1997 Annual and 2006 24-hour Fine Particulate Matter (PM _{2.5}) NAAQS. Additionally, EPA is converting the previous disapprovals of Florida's infrastructure SIPs related to the CAA GHG PSD permitting requirements for the above NAAQS to full approvals.

The SIP revision updates the attainment emissions inventory and the maintenance demonstration, including the projected future emissions inventories, in the maintenance plan for the Hillsborough County lead maintenance area for the 2008 lead national ambient air quality standards (NAAQS). The SIP revision also incorporates recent changes to the air construction permit for the EnviroFocus Technologies, LLC, facility in the Area that are related to an increase in the refined lead production limit. EPA believes that this SIP revision meets all relevant Clean Air Act statutory and regulatory requirements, is consistent with EPA's guidance, and is in accordance with EPA's 9/11/2018, redesignation of the Hillsborough Area from nonattainment to maintenance.

This MSW Landfills Federal Plan includes the same elements as required for a state plan: identification of legal authority and mechanisms for implementation; inventory of designated facilities; emissions inventory; emission limits; compliance schedules; a process for the EPA or state review of design plans for site-specific gas collection and control systems (GCCS); testing, monitoring, reporting and record keeping requirements; and public hearing requirements. Additionally, this action summarizes implementation and delegation of authority of the MSW Landfills Federal Plan.

3/11/2021	3/11/2021	10/8/2021	NATIONAL EMISSION STANDARDS FOR HAZARDOUS AIR POLLUTANTS - General Provisions	63	A	63.6	EPA amends the CFR to reflect a court order regarding the General Provisions for NESHAPs issued on 12/19/2008 by the U.S. Court of Appeals for the D.C. Circuit (the court). The court vacated two provisions in the General Provisions that exempted sources from hazardous air pollutant (HAP) non opacity and opacity emission standards during periods of startup, shutdown, and malfunction (SSM). The court held that under the Clean Air Act (CAA), emissions standards or limitations must be continuous in nature and that the SSM exemptions in these two provisions violate this requirement. This ministerial action revises these two NESHAP General Provisions in the CFR, § 63.6(f)(1) and (h)(1), to conform to the court's order.

<u>10/7/2020</u>	12/7/2020	10/8/2021	NATIONAL EMISSION STANDARDS FOR HAZARDOUS AIR POLLUTANTS FOR SOURCE CATEGORIES - General Provisions	63	A	63.2	Corrects and updates regulations for source testing of emissions.
<u>9/16/2020</u>	9/16/2020	10/8/2021	APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS - Florida	52	K	52.520	Consistent with an EPA regulation completed in 2007, EPA is approving the rules for Florida that modify the definition of chemical process plant to exclude ethanol manufacturing facilities that produce ethanol by natural fermentation processes. Approving these modified definitions clarifies that the PSD major source applicability threshold in the SIP for these ethanol plants is 250 tons per year (tpy) (rather than 100 tpy) and removes the requirement to include fugitive emissions when determining if the source is major for PSD. EPA concludes that the changes to the state rules are approvable because the Agency believes that they are consistent with EPA regulations governing state PSD programs and will not interfere with any applicable requirement concerning attainment and reasonable further progress (as defined in section 171 of the Clean Air Act (CAA or Act)), or any other applicable requirement of the CAA.

The EPA granted reconsideration on the fugitive emissions requirements, well site pneumatic pump standards, requirements for certification of closed vent systems (CVS) by a professional engineer (PE), and the provisions to apply for the use of an alternative means of emission limitation (AMEL). This final action includes amendments as a result of the EPA's reconsideration of the issues associated with the above mentioned four subject areas and other issues raised in the reconsideration petitions for the NSPS, as well as amendments to streamline the implementation of the rule. This action also includes technical corrections and additional clarifying language in the regulatory text and/or preamble where the EPA concludes further clarification is warranted.

These amendments remove sources in the transmission and storage segment from the source category, rescind the NSPS (including both the volatile organic compounds (VOC) and methane requirements) applicable to those sources, and separately rescinds the methane-specific requirements of the NSPS applicable to sources in the production and processing segments. Furthermore, the EPA adopts an interpretation of Clean Air Act (CAA) section 111 under which the EPA, as a predicate to promulgating NSPS for certain air pollutants, must determine that the pertinent pollutant causes or contributes significantly to dangerous air pollution.

<u>8/14/2020</u>	8/14/2020	10/8/2021	REQUIREMENTS FOR PREPARATION, ADOPTION, AND SUBMITTAL OF IMPLEMENTATION PLANS	51	Appendix P	Paragraph 1.0; Paragraph 4.1; Paragraph 4.6; Paragraph 5.2.3; Paragraph 5.3.3.	Amends a regulation that specifies what State Implementation Plans (SIPs) must require of sources in four categories with respect to continuous emission monitoring, recording, and reporting. Specifically, the amendments revise provisions that specify the minimum frequency for submitting reports of excess emissions that must be included in SIPs. The minimum frequency is being revised from "for each calendar quarter" to "twice per year at 6-month intervals." The four source categories covered are: Fossil fuel-fired steam generators; fluid bed catalytic cracking unit catalyst regenerators at petroleum refineries; sulfuric acid plants; and nitric acid plants. As a result of this revision, states may choose to revise their SIPs to reflect the revised minimum frequency specified in our regulations. This action also corrects an erroneous cross-reference in regulations.

4/22/2020	4/22/2020 (Expires, at the latest, 10/19/2020)		CONTINUOUS EMISSION MONITORING - Reporting Requirements	75	G	75.68	Amends the emissions reporting regulations applicable to sources that monitor and report emissions under the Acid Rain Program, the Cross-State Air Pollution Rule (CSAPR), and/or the NOX SIP Call. The amendments provide that if an affected unit fails to complete a required quality assurance, certification or recertification, fuel analysis, or emission rate test by the applicable deadline under the regulations because of travel, plant access, or other safety restrictions implemented to address the current COVID-19 national emergency and if the unit's actual monitored data would be considered valid if not for the delayed test, the unit may temporarily continue to report actual monitored data instead of substitute data. Sources must maintain documentation, notify EPA when a test is delayed and later completed, and certify to EPA that they meet the criteria for using the amended reporting procedures. Substitute data must be reported if those criteria are not met or if monitored data are missing or are invalid for any non-emergency-related reason. Units are required to complete any delayed tests as soon as practicable after relevant emergency-related restrictions no longer apply, and the emergency period for which a unit can report valid data under the amendments is limited to the duration of the COVID-19 national emergency plus a grace period of 60 days to complete delayed tests, but no later than the date of expiration of the amendments.
