

CHILDREN & FAMILIES Office of Head Start

Dear Head Start recipients,

The Office of Head Start will not approve the use of federal funding for any training and technical assistance (TTA) or other program expenditures that promote or take part in diversity, equity, and inclusion (DEI) initiatives. This includes expenditures for services provided by contractors or vendors. This guidance is consistent with the nondiscrimination provisions in Sec. 654 of the Head Start Act:

(a) The Secretary shall not provide financial assistance for any program, project, or activity under this subchapter unless the grant or contract with respect thereto specifically provides that no person with responsibilities in the operation thereof will discriminate with respect to any such program, project, or activity because of race, creed, color, national origin, sex, political affiliation, or beliefs.

With your next application submission, Head Start grant recipients should carefully review their annual funding application, including the budget and budget justification narrative, TTA plans, program goals, and any other supplemental materials to ensure they are in accordance with this guidance.

Please direct any questions regarding this guidance to your regional office.

/ Andrew Gradison /

Andrew Gradison
Acting Assistant Secretary
Administration for Children and Families

Suggested Replacement Language for Eligibility Criteria Ranking Form

"Families with Limited Access to Community Resources due to Residency or Documentation Barriers" (Verified through a partnering agency or disclosed during the intake process)

- This phrasing highlights a family's access to resources, which is a key element in the community needs assessment, without labeling based on immigration status.
- Residency or documentation barriers" is broad enough to include undocumented immigrants, refugees, and recent arrivals without using specific terms like "immigrant" or "refugee."

"Families Experiencing Barriers to Enrollment or Public Services Due to Residency Status or Recent Arrival" (Verified through a community partner or reported during intake)

• This highlights the challenge (barriers to services) rather than the group, and "recent arrival" is a neutral term that includes refugees, immigrants, and others.

"Households with Limited Civic Integration or Unverified Housing or Employment History" (Supported by documentation from community-based organizations or through intake screening)

• Focuses on systemic challenges (lack of integration, documentation gaps) rather than immigration status, and it covers both formal and informal living/work situations, often common among unauthorized immigrants.
