**SUBJ: Approval to Convert a Multi-Way Stop to a Two-Way Stop at the
Intersection of Minnesota Avenue and Overspin Drive**

Traffic Engineering conducted a multi-way stop study, which consisted of an evaluation of existing field conditions including critical approach speed, sight distance, traffic volumes, and crash history. Current traffic conditions do not meet the minimum vehicular volume warrants.

Staff recommends that the Board approve the removal of the multi-way stop control and that it be converted to a two-way stop at the intersection of Minnesota Avenue and Overspin Drive.

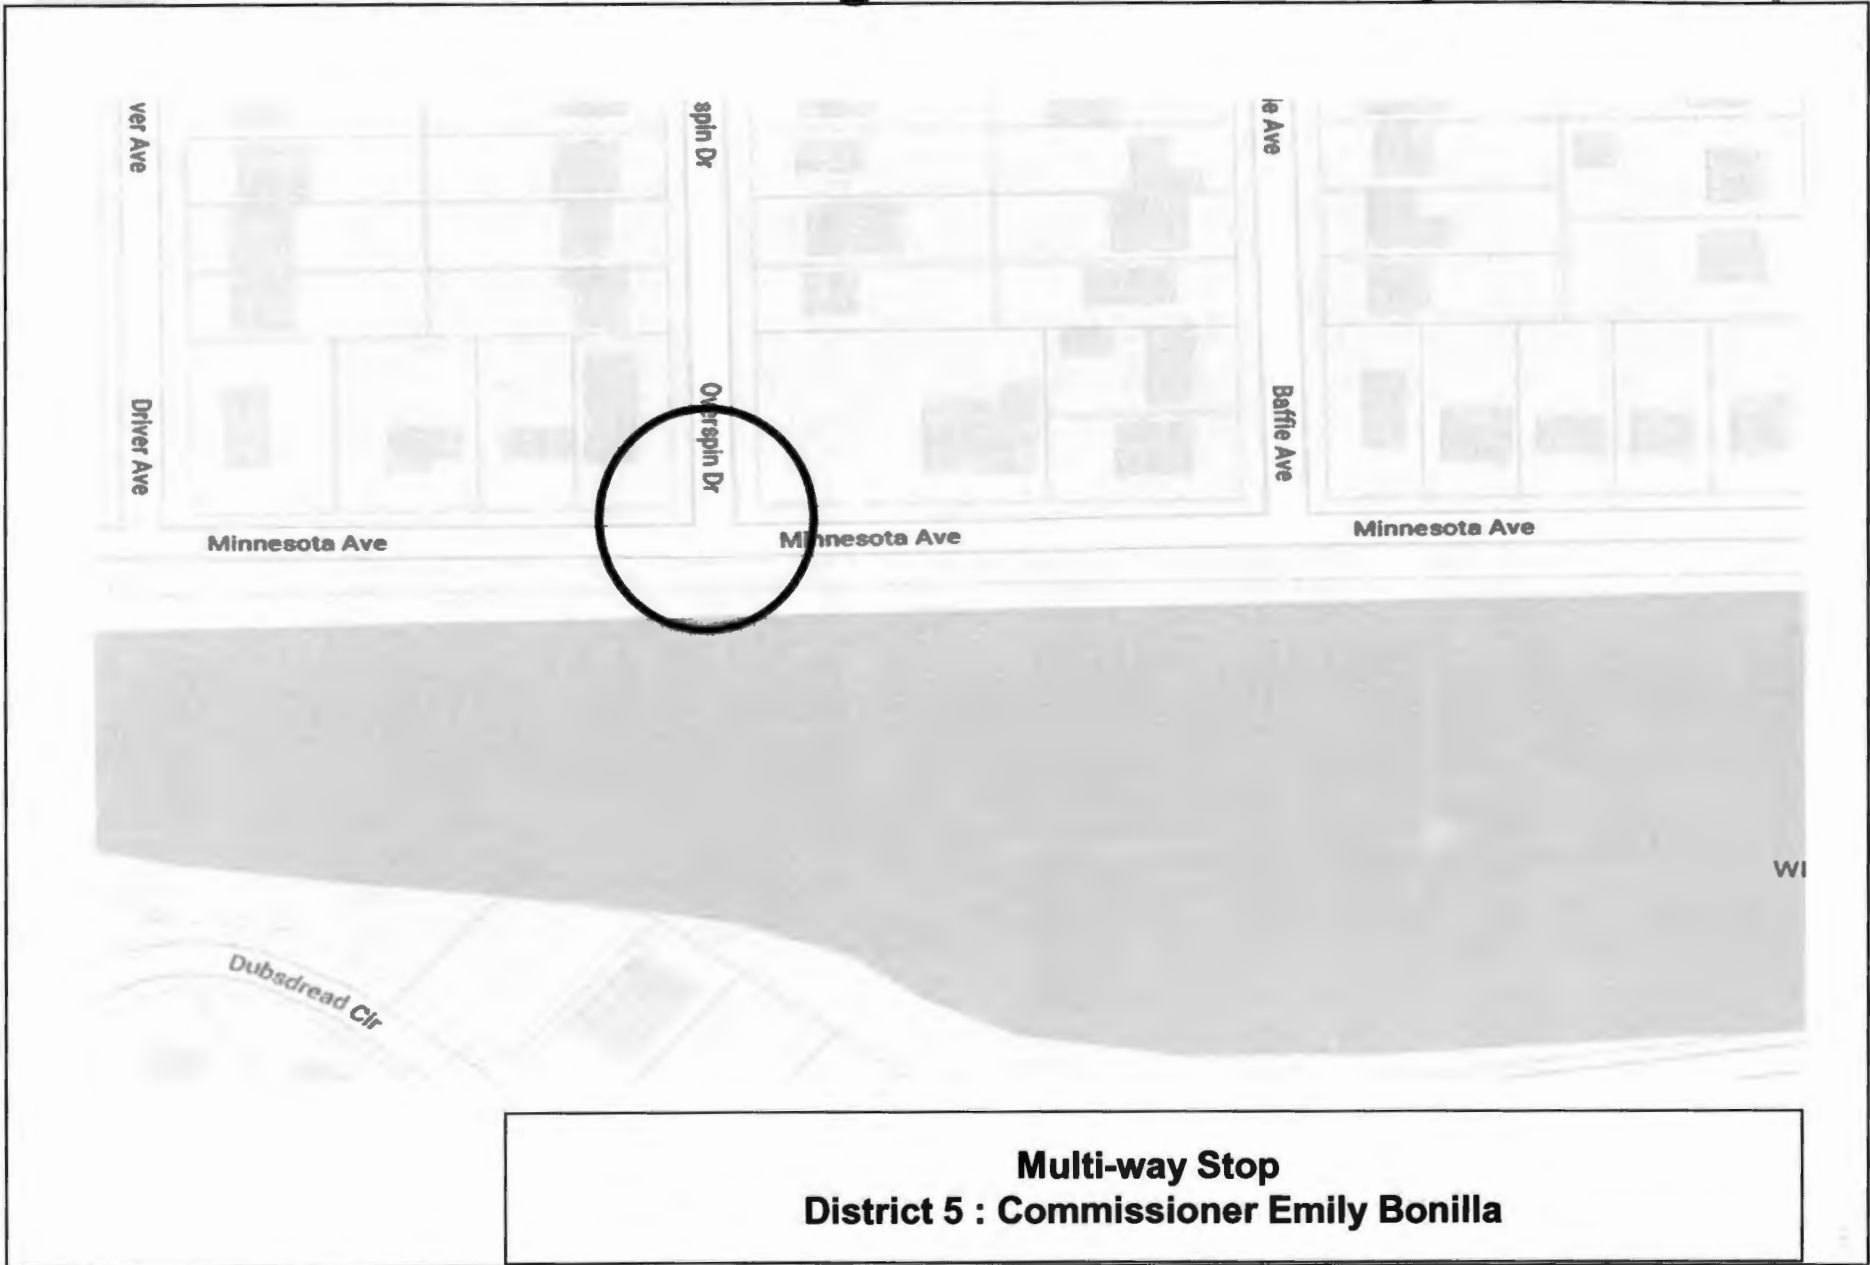

**Action Requested: Approval to convert a Multi-Way Stop to a Two-Way Stop at
the intersection of Minnesota Avenue and Overspin Drive.
District 5.**
