

A REQUEST TO REMAIN REMOVED FROM THE LAKE PICKETT STUDY AREA OF THE SOUTH COMMUNITY

On January 16, 2025, a group of neighbors residing on Corner Lake presented a document at the public hearing requesting that our parcels remain included in the Lake Pickett Study Area of the South Community. The document specifically requested that our properties be transferred from the "Removal Table" (Table 2) to the "Remain Table" (Table 1). At the time of the hearing, the North Community, located north of Lake Pickett Rd., was proposed to be removed from the LP Study Area. Our parcels were also proposed to be removed from the Study Area with the intent that LPN and our neighborhood area would remain rural/agricultural.

At the time of that hearing, our group had been misinformed about the facts. We were under the impression that if we were removed, we would also be removed from all communication regarding future development in the LPSA. Our group is adamantly opposed to high density development, and it is our intent to remain rural/agricultural. Therefore, please accept our apologies and accept this updated petition as our request to be removed from LPSA and remain in LPN North. It is our true intent to remain rural/agricultural in our zoning. Thank you.
