STATE ROAD 408 CAPACITY IMPROVEMENTS PROJECT DEVELOPMENT AND ENVIRONMENT (PD&E) STUDY CFX PROJECT NUMBER: 408-174

The Central Florida Expressway Authority (CFX) is holding a public meeting for the State Road 408 Capacity Improvements Project Development and Environment (PD&E) Study. The purpose of the study is to develop alternatives for capacity improvements on westbound and eastbound SR 408 between Kirkman Road and Church Street.

More than 164,000 vehicles per day travel on SR 408 near downtown Orlando. This study has evaluated alternatives for improving traffic flow by adding one travel lane in each direction within the project limits. If construction is approved, most of the work would occur within CFX's existing SR 408 right of way.

CFX developed and evaluated alternatives with the goal of determining a preferred alternative. All factors related to the design and location of the project were considered, including transportation needs, financial feasibility, social impacts, economic factors, environmental impacts, engineering analysis and right-of-way requirements.

The public meeting is being held both in person and virtually on Tuesday, February 28, 2023. Please see below for details on how to participate:

STATE ROAD 408 WESTBOUND CAPACITY IMPROVEMENTS PROJECT DEVELOPMENT AND ENVIRONMENT (PD&E/PD1) STUDY CFX PROJECT NUMBER: 408-175

The Central Florida Expressway Authority (CFX) is holding a public meeting for the State Road 408 Westbound Capacity Improvements Project Development and Environment (PD&E/) Study. The purpose of the study is to develop alternatives for capacity improvements on westbound SR 408 between Interstate 4 (I-4) and Goldenrod Road.

More than 164,000 vehicles per day travel on SR 408 with a significant portion travelling westbound in the morning from east Orlando to reach downtown and I-4. This study has evaluated alternatives for improving traffic flow by providing a continuous five-lane section in the westbound direction within the project limits.

This PD&E study evaluated the addition of one westbound lane from I-4 to Bumby Avenue and from SR 436 (Semoran Boulevard) to Goldenrod Road, matching previous improvements in between Bumby Avenue and Se 436. If approved for construction, most of the work would occur within SR 408's existing right of way.

CFX developed and evaluated alternatives to determine a preferred alternative. All factors related to the design and location of the project were considered including transportation needs, financial feasibility, social impacts, economic factors, environmental impacts, engineering analysis and right-of-way requirements.

The online public meeting is being held on Monday, February 27, 2023. Please see below for details on how to participate:
