Utilities

EXPENDITURE HIGHLIGHTS

Personal Services – The FY 2025-26 personal services budget includes a 5.0% salary increase for non-bargaining employees. The Florida Retirement System (FRS) rates are budgeted at amounts approved by the State Legislature for employer retirement contributions. The budget for employer health insurance contributions remains status quo at \$19,000 per employee to cover medical costs. The department's authorized position net change is an increase of four (4) positions: a Meter Reader II to read water and reclaimed water meters used to generate bills for customers; a Project Manager to lead planning and implementation efforts to identify new solid waste facility types, create a plan to be followed in developing new solid waste facilities, and coordinate with consultants and contractors to implement these facility developments to meet the county's long term disposal need; a Sr. Operations Specialist to teach the Water and Wastewater curricula to students enrolled in H2O Pipeline, which is a workforce development program designed to prepare students for the Florida Department of Environmental Protection (FDEP) Class C Water and Wastewater license tests with the goal to transition high school students into employment for a utility; and, an Environmental Compliance Tech/Inspector for required inspections, discharge sampling, and administrative functions for the Industrial Pre-Treatment Program (IPP), the Oil and Grease prevention program, and the Surcharge program.

Four (4) New Positions FY 2025-26

- 1 Meter Reader II, Customer Service Division
- 1 Project Manager, Solid Waste Division
- 1 Sr. Operations Specialist, Water Division
- 1 Environmental Compliance Tech/Inspector, Water Reclamation Division

Operating Expenses – The FY 2025-26 operating expenditures budget is increasing by 4.2% or \$11.1 million from the current FY 2024-25 budget. The increase is primarily due to a \$25.6 million increase in payments to the franchise haulers resulting from the new collection contract that begins on January 1, 2026. This significant increase is a result of the contracts being rebid at current market conditions after the current 10-year contracts expired. The existing contracts began in 2016 and had defined price escalations, which helped protect the program customers from higher inflationary pressures during the 10-year term. The current contracts for collection are set to end in December 2025. The county pursued new contracts through a competitive solicitation, and new contracts were awarded to four (4) haulers for six (6) geographic zones set to begin on January 1, 2026.

Additional increases include an increase of 12.4% or \$2.3 million for Payments to Other Government Agencies due to customer growth and an increase in disposal costs in the Mandatory Refuse Program, an increase of 16.4% or \$1.8 million for Landfill Closure Costs and Long Term Care - Landfill Closure based on the annual calculation for the project liability, and an increase of 4.4% or \$353,784 in chlorine costs due to contract price increases, with a total budget of \$42.2 million.

This budget increases are partially offset by decreases in Maintenance of Buildings, Maintenance of Mains, Contract Services, Consultant Services, Equipment less than \$5,000, and Polymer, with a total reduction budget amount of \$53.2 million. These decreases are due to the carryforward encumbrances in the current FY 2024-25 budget from the FY 2023-24 budget for work and purchases not completed in that fiscal year. Additionally, the Solid Waste and Water & Wastewater System customer service call centers merged reallocating the contract budget for four (4) temporary positions from the Refuse Collection Fund to Water & Wastewater System providing better customer service and efficiencies.

Capital Outlay – The FY 2025-26 capital outlay budget is decreasing by 37.4% or \$6.9 million from the current FY 2024-25 budget. Most capital outlay items are purchased based on replacement schedules that include length of service, age, and maintenance cost. The budget for heavy and other equipment is \$10.0 million and includes funding for large lab equipment, process control monitoring units, utility carts, a tractor, skid steer, dump truck loader and a CAT motor grader in the Water & Wastewater System. The budget also includes funding for the replacements of trailers, a dump truck, road tractors, dozers, and the purchase of a crawler carrier in the Solid Waste Division. The departmental rolling stock budget is \$1.4 million and includes 17 replacement vehicles and one (1) new vehicle, as approved by the Vehicle Requirements Utilization Committee (VRUC).

Capital Improvements – The FY 2025-26 capital improvements budget is decreasing by 5.4% or \$16.9 million from the current FY 2024-25 budget. The projects include improvements to the water, wastewater, and solid waste facilities as well as construction of pipelines for the water, wastewater, and reclaimed water systems, and to address the renewal and replacement of aging infrastructure. Please refer to the detailed Capital Improvements Program section of this document for a complete listing of projects for the department.

Debt Service – The FY 2025-26 debt service budget is increasing by 14.2% or \$4.2 million from the current FY 2024-25 budget. Debt service payments are based on the principal and interest payments for existing bonds, anticipated debt financing, state revolving fund loans, and other minor debt related expenses.

Reserves – The FY 2025-26 reserves are decreasing by 0.6% or \$1.4 million from the current FY 2024-25 levels. The department maintains restricted reserves for debt service, customer deposits, and for financing future closure and long-term care costs of landfill cells. Reserves are also in place to fund future capital improvements and to serve as a contingency in the event of emergencies. Reserves fluctuate due to the flow of program revenues, expenses, and the issuance of debt.

Other – The FY 2025-26 other category budget is decreasing by 14.2% or \$2.3 million from the current FY 2024-25 level and includes the General Fund interfund transfer, which is budgeted at \$13.0 million based on a payment in lieu of taxes calculation. Also, included in this category is \$1.0 million for Connection Fee refunds.

FUNDING SOURCE HIGHLIGHTS

The Utilities Department receives revenue from the operations of two (2) enterprise funds, the Water & Wastewater System and the Solid Waste System, one (1) special revenue fund, the Municipal Service Benefit Unit (MSBU) fund for the Mandatory Refuse and Recycling Program, and various state grants. The enterprise funds are increasing by 2.3% or \$19.0 million primarily due to the 12% increase in tipping fees and an increase in cash brought forward from the Solid Waste System. The special revenue fund (MSBU) is increasing by 20.9% or \$24.7 million due to an increase in program fee revenue, cash brought forward and customer growth. Total grant funds are decreasing by \$48.8 million due to the timing in which grants are awarded. Remaining balances in these grants are rolled over to the following fiscal year after the budget is adopted.

Water and Wastewater Fund – Monthly water and wastewater charges include a fixed component and a volume charge to cover actual usage. Rates are established by the Board of County Commissioners (BCC) and are designed to cover the operating and maintenance costs, debt service expenses, and other requirements of the Water & Wastewater System. In May of 2022 the Board approved a 5-year plan for water and wastewater rates to achieve parity between residential and commercial effective rates that will continue in FY 2025-26. The Board also approved a new reclaimed water rate schedule and a revised water and wastewater capital charge ordinance on February 11, 2025. The new reclaimed water rate schedule will take effect on October 1, 2025 and was established to recover 100% of the costs of the reclaimed water system. The Utilities Department has been directed by the Board to review capital charges periodically. These charges were last updated in FY 2018-19 prior to the pandemic, and the updated charges include the extraordinary inflation that the department has experienced in the last few years. The new charges took effect on April 1, 2025, but the full effect of these changes will not be felt until FY 2025-26. Additionally, to meet operational requirements and debt service expenditures, the Utilities Department is recommending a 3.0% increase to all other system rates for FY 2025-26.

Solid Waste Fund – The Solid Waste System enterprise fund is supported by rates, fees and charges for services provided to the residents and businesses of Orange County. In FY 2023-24, the Board adopted a 3-year rate plan to increase tipping fees by 12% each year to meet the increasing revenue requirement for cell construction. The FY 2025-26 budget includes the 12% tipping fee increase as the last year of the 3-year rate plan.

Mandatory Refuse Fund – The Mandatory Refuse Fund collects fees to cover the cost of the Mandatory Refuse and Recycling Program that provides for the collection of household garbage, yard waste, bulk items, and recyclables in unincorporated Orange County. Orange County contracts with four (4) haulers to collect these materials from households in six (6) geographic zones within Orange County. Commercial establishments do not participate in this program and must contract separately with waste haulers. The Orange County Tax Collector collects a non-ad valorem assessment on the annual tax bills as payment of fees for residential customers. On June 3, 2025, the Utilities Department recommended to the Board an increase of \$100.00 to the annual MSBU rate charged to customers to cover the increased costs for residential refuse and recycling collection and disposal services for FY 2025-26. The tentative approved annual rate is \$400.00 per household.
