

Interoffice Memorandum

December 5, 2019

TO: Mayor Jerry L. Demings
and Board of County Commissioners

FROM: Joseph C. Kunkel, P.E., Director, Public Works Department

CONTACT PERSON: **Humberto L. Castellero, P. E., PTOE, Interim Manager**
Traffic Engineering Division

PHONE NUMBER: (407) 836-7891

SUBJ: **Granada P.D. South Entrance at Turkey Lake Road – Traffic Signal Operation**

The Granada P.D. road agreement, approved on April 11, 2017, requires the developer to escrow funds to install a traffic signal at the Granada P.D. southern entrance along Turkey Lake Road based on a traffic study warranting and justifying the signal. In lieu of escrowing the funds, the developer constructed the signal in phases and placed it in flashing operation until full signal operation is warranted. The Board approved the recommendation at the July 11, 2017 meeting.

Traffic Engineering staff evaluated the residents concerns and found that the new driveway does not provide adequate sight distance and there are insufficient gaps to make left turn movements. Safety can be further improved if the signal is placed in full operation. Changing the signal from flashing to full operation is based on safety.

Staff recommends approval to change the signal from flashing to full operation.

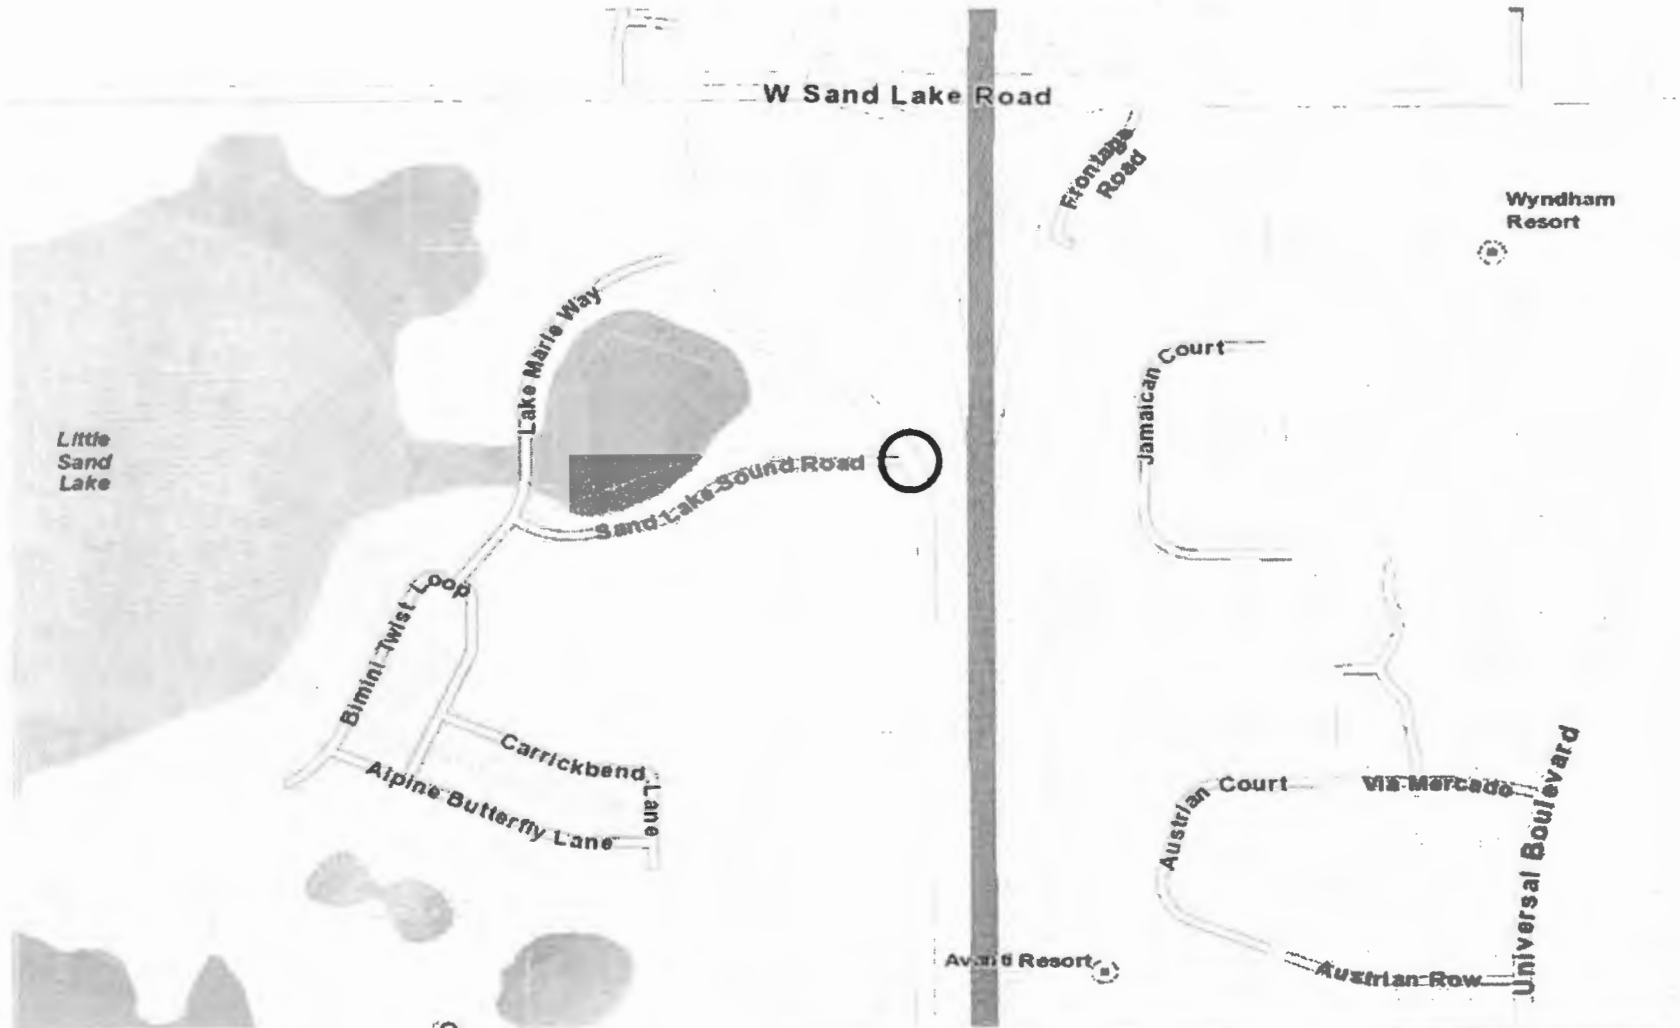

Action Requested: Approval to change the traffic signal at Granada P.D. south entrance from flashing to full operation. District 1.
