

Interoffice Memorandum

AGENDA ITEM

August 17, 2017

TO: Mayor Teresa Jacobs
—AND—
Board of County Commissioners

FROM: Jon V. Weiss, P.E., Director
Community, Environmental and Development
Services Department

SUBJECT: August 29, 2017 – Work Session Item
Non-Maintained Roads

The Public Works Department maintains over 2,600 miles of roads in Orange County, primarily funded by gas taxes. These roads range from major arterials such as John Young Parkway and University Boulevard to thousands of local streets within residential subdivisions. Roadway-related infrastructure maintained by the County includes the roadway itself, drainage systems, signs, and traffic control devices.

In addition to County-maintained roads, there are a number of non-maintained roads and private drives that provide dedicated access to properties of record. The Board first adopted a policy regarding these non-maintained roads in 1977, with the current policy approved by the Board in 2001 (attached). This policy identifies the circumstances upon which these roads will be accepted for County maintenance and how development permits are conditioned along each type of road or right of way.

The purpose of the presentation is to review with the Board its current policy regarding Open Non-Maintained Roads and Unopened Unimproved Rights of Way. The costs to improve both road classifications will be discussed, along with numerous examples of subdivisions across the County with non-maintained roads.

This presentation is for informational purposes only; no action is being requested.

Orange County Public Works Department

Policy on Unopened Unimproved Rights of Way & Unopened Non-Maintained Roads

Effective December 1, 2001

**POLICY ON UNOPENED UNIMPROVED RIGHTS-OF-WAYS
EFFECTIVE DECEMBER 1, 2001**

General:

Platted unopened public rights of ways within unincorporated Orange County are numerous. Florida Statutes do not mandate the Board of County Commissioners (BCC) to improve these rights of ways for development. From time to time, parcel owners(s) request these unimproved rights of ways to be opened for access for parcel development. Orange County requires the rights of way be improved to County standards in accordance with current County "Subdivision Regulations" (Chapter 34, Orange County Code). As illustrated in Exhibit "A".

The road improvements shall extend from the access point of the parcel being developed to the closest paved road.

The developer(s) of the parcel(s) will bear the burden of all applicable costs for planning, right of way, survey, and design all applicable permitting and establish a "letter of credit" for the workmanship and materials for one year after the road is complete and accepted by the County. Orange County will assume maintenance for these sections of right of way provided the roadway is improved to acceptable paved road standards in accordance with the subdivision requirements.

Parcel Development:

Parcel development reviews, permitting and infrastructure construction process may occur simultaneously with road improvements. No "Certificate of Occupancy" will be issued until the road improvements are completed and accepted by Orange County.

The execution of a "Non-Maintenance Agreement" and the "Notice of Future Assessments" by the parcel developer shall not be accepted in lieu of the requirements to improve the roadway to County standards for unopened unimproved rights of ways.

Construction Requirements:

Five signed and sealed sets of construction plans and two signed and sealed copies of engineer's estimates must be submitted to the Orange County Public Works Development Engineering Department for review and approval. All plans documents and pertinent documents are to be prepared and certified by a registered professional engineer in the State of Florida. Plans are to be reviewed as a General Engineering "E" Project. Payment of appropriate review fees shall be required by the developer.

Upon approval by Orange County, a Right of Way Utilization Permit must be obtained. (Note: Other County, State, and Federal permits might be required.). The permit application form can be obtained from the Development Engineering Division Permitting Section. It must be completed and submitted to this section along with the corresponding permit fee payment.

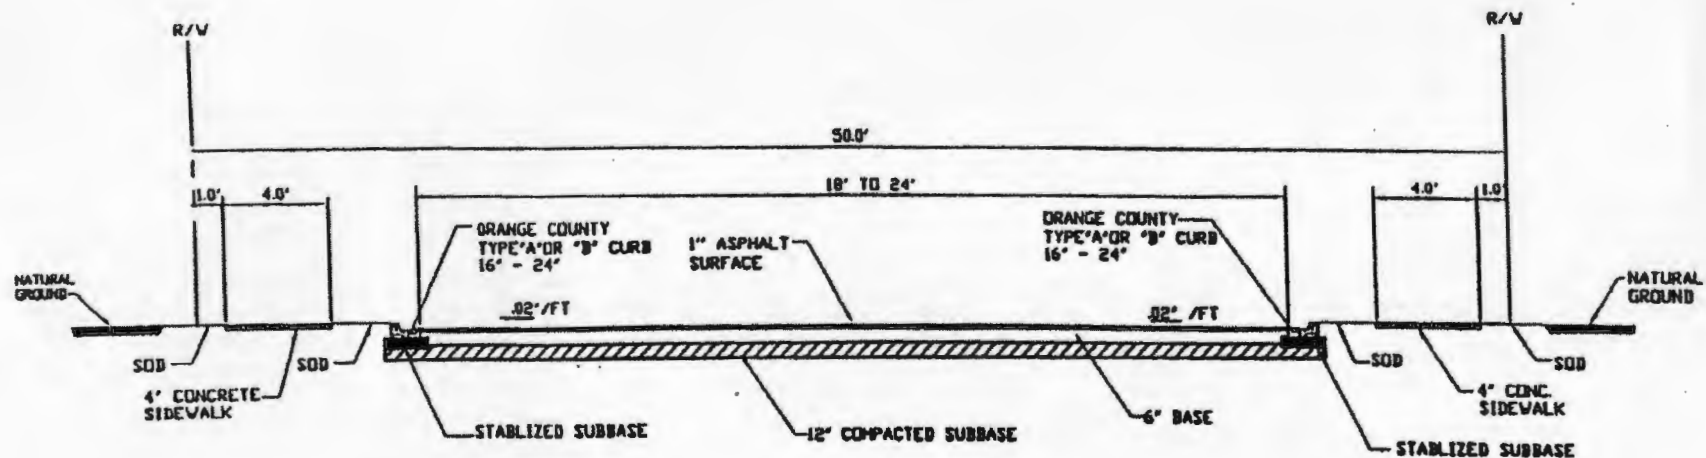

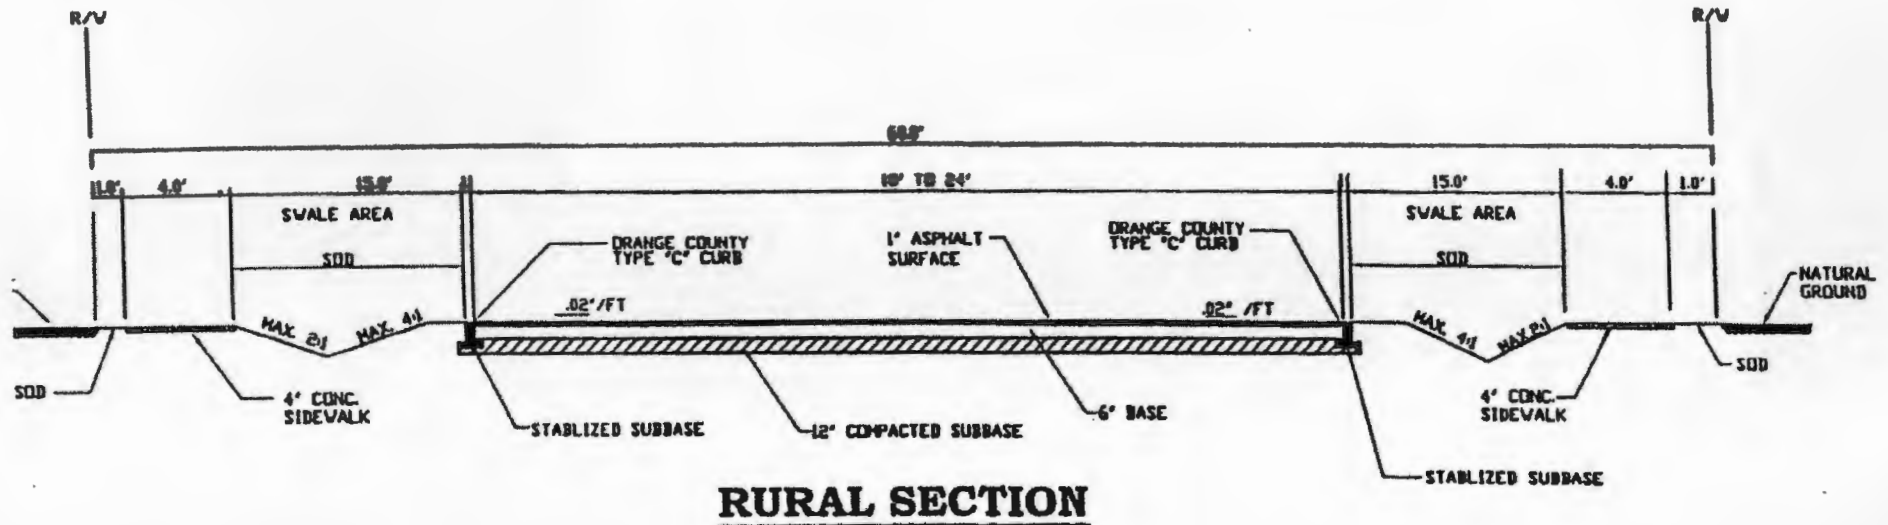

Once the Right of Way Utilization Permit is approved, construction of the roadway can begin. During construction, the County shall perform periodic inspections of all work.

Project Completion:

After all required improvements have been installed the Engineer of record shall submit record drawing to the County certifying the improvements have been constructed according to approved

plans and specifications. Upon final inspection and acceptance by the County Engineer, the roadway will be accepted for maintenance. A "Letter of Credit" will be posted to warrant all workmanship and materials for a period of one year upon completions of the improvements and prior to acceptance.

TYPICAL CROSS SECTION FOR UNOPENED UNIMPROVED RIGHT-OF-WAY

NOTE:
REFER TO THE ORANGE COUNTY ROAD CONSTRUCTION
SPECIFICATION AND THE ORANGE COUNTY SUBDIVISION
REGULATION (CHAPTER 34) LATEST EDITION FOR DETAILS

URBAN SECTION

**POLICY ON OPENED NON-MAINTAINED ROADS
EFFECTIVE DECEMBER 1, 2001**

General:

Property owners along an open non-maintained road desiring to have their road paved with the porous pavement, must petition the Board of County Commissioners (BCC) requesting that their particular roads be improved. The petition is to be submitted to the Public Works Director, 4200 South John Young Parkway, Orlando, Florida 32839. Roadways considered under the definition of an "Open Non-Maintained Road" are:

- Roadway sections listed in the "Appendix," Alternative Surface List.
- An existing traveled way used to access two or more existing residential homes.

The petitioner must demonstrate the travel way is utilized on a daily basis by the occupants of the homes.

- Travel ways to commercial parcels, condominiums, apartments, mobile home parks, and any private driveways serving a single residential parcel are excluded.

The petition requires 67% of the parcel owners fronting the particular section of roadway are in agreement to initiate the improvement and are willing to donate 100% of any right of way required to construct the road.

Petitioner(s) Construction Requirements:

The petitioner(s) shall bring the road to approved minimum dirt road standards in accordance with the typical cross section illustrated in Exhibit "B." This standard includes the dedication and recordation of required right of way, appropriate drainage improvements and road construction, which will allow the road to be permitted by the Water Management District for

paving. A basic Right of Way Utilization Permit shall be required prior to work beginning. The Roads and Drainage Division can be contacted for consultation during any phase of the work. Upon determination by the County that the roadway meets the standards as shown in Exhibit "B," the property owner and the County will then petition the Water Management District for a permit to pave the road with porous pavement.

Alternative Funding:

The petitioner(s) may request a Municipal Service Taxing Unit (MSTU) to be established to cover the costs of bringing the roadway to the minimum standards. The MSTU may include planning, design, survey, permitting, pertinent drainage improvements, preparation of deeds, recordation of deeds, construction plan preparation, and contract administration. A MSTU will be established for improvements with a pay back period of up to ten years. MSTU funds will be obtained through private sector financing institutions.

Orange County may elect to administer a contract for any portion of the design, permitting, and construction administration under the MSTU process that the property owner request.

County Participation:

Once the roadway is brought to acceptable standard as illustrated in Exhibit "B," the County will begin maintenance and will complete the project with porous pavement and sodding/seeding/mulch as illustrated in Exhibit "C." The cost for paving and sodding/seeding/mulch will be the responsibility of Orange County. Paving will occur within one year upon acceptance.

Development:

Development of the parcels abutting the roadway determined to be open non-maintained will be allowed to continue. Prior to any building permits being issued, a "Notice of Future Assessment and a Non-Maintenance Agreement" and any other appropriate permits will be executed by the parcel owner to run concurrent with the land. Development beyond the determined open non-maintained roadway limits will be required to comply with the policy for "Unopened Unimproved Rights of Ways."
