(f) A statement of the specific rules or statutes the petitioner contends require reversal or modification of the agency's proposed action, including an explanation of how the alleged facts relate to the specific rules or statutes; and

(g) A statement of the relief sought by the petitioner, stating precisely the action petitioner wishes the agency to take with respect to the agency's proposed action.

A copy of the petition must also be mailed at the time of filing to the District Office at the address indicated above. Failure to file a petition within the 21-day period constitutes a person's waiver of the right to request an administrative hearing and to participate as a party to this proceeding under Sections 120.569 and 120.57, Florida Statutes. Mediation under Section 120.573, Florida Statutes, is not available in this proceeding.

#### A. **Project Description:**

This P2 project is intended to meet the requirements of the stipulated penalties assessed as part of the above cited consent orders for subsequent SSO events, as well as the SFCO for the Eastern Water Reclamation Facility OGC 23-1787 (July 2024). The proposed project is the installation of three (3) electric vehicle charging stations at:

#### **Eastern Regional Water Supply Facility**

9100 Curry Ford Road  
Orlando, FL 32825

#### **Southern Regional Water Supply Facility**

13000 S. Orange Avenue  
Orlando, FL 32824

#### **Western Regional Water Supply Facility**

2552 Lakeville Road  
Apopka, FL 32703

#### B. **Environmental and Economic Benefits:**

The installation of 3 electric vehicle charging stations supports the Utilities goals of reducing its carbon footprint by providing infrastructure enabling a transition away from internal combustion engine driven vehicles. Each internal combustion engine vehicle that is replaced with a fully electric vehicle reduces carbon emissions by 2,430 lbs. per year. (EPA Office of Transportation and Air Quality; Greenhouse Gas Emissions from a Typical Passenger Vehicle; March 2018).

Orange county Utilities continues to migrate towards zero combustion, electric vehicles and additional charging stations are needed to meet the increased charging demands.
