Citizens and Orange County Utilities staff with safety concerns requested that the Traffic Engineering Division review the traffic control at the intersection of Young Pine Road and Leevista Boulevard.

Traffic Engineering conducted an evaluation of existing field conditions including topography, geometric constraints, sight distance and crash history. In support of the results and to improve traffic operations, including pedestrian safety, Traffic Engineering staff recommends that the existing two-way stop control at Leevista Boulevard be converted to a multi-way stop control at the intersection of Young Pine Road and Leevista Boulevard.
