SUBJ: Establishment of a Multi-Way Stop Condition at Intersection of Tilden Road and Tiny Road

A citizen with safety concerns requested that the Traffic Engineering Division review the traffic control at the intersection of Tilden Road and Tiny Road.

Traffic Engineering conducted a multi-way stop study, which consisted of an evaluation of existing field conditions including critical approach speed, sight distance, traffic volumes, and crash history. To improve safety, staff recommends that the existing one-way stop control be converted to a multi-way stop control at the intersection of Tilden Road and Tiny Road.

Staff recommends that the Board approve the establishment of a multi-way stop condition at Tilden Road and Tiny Road.

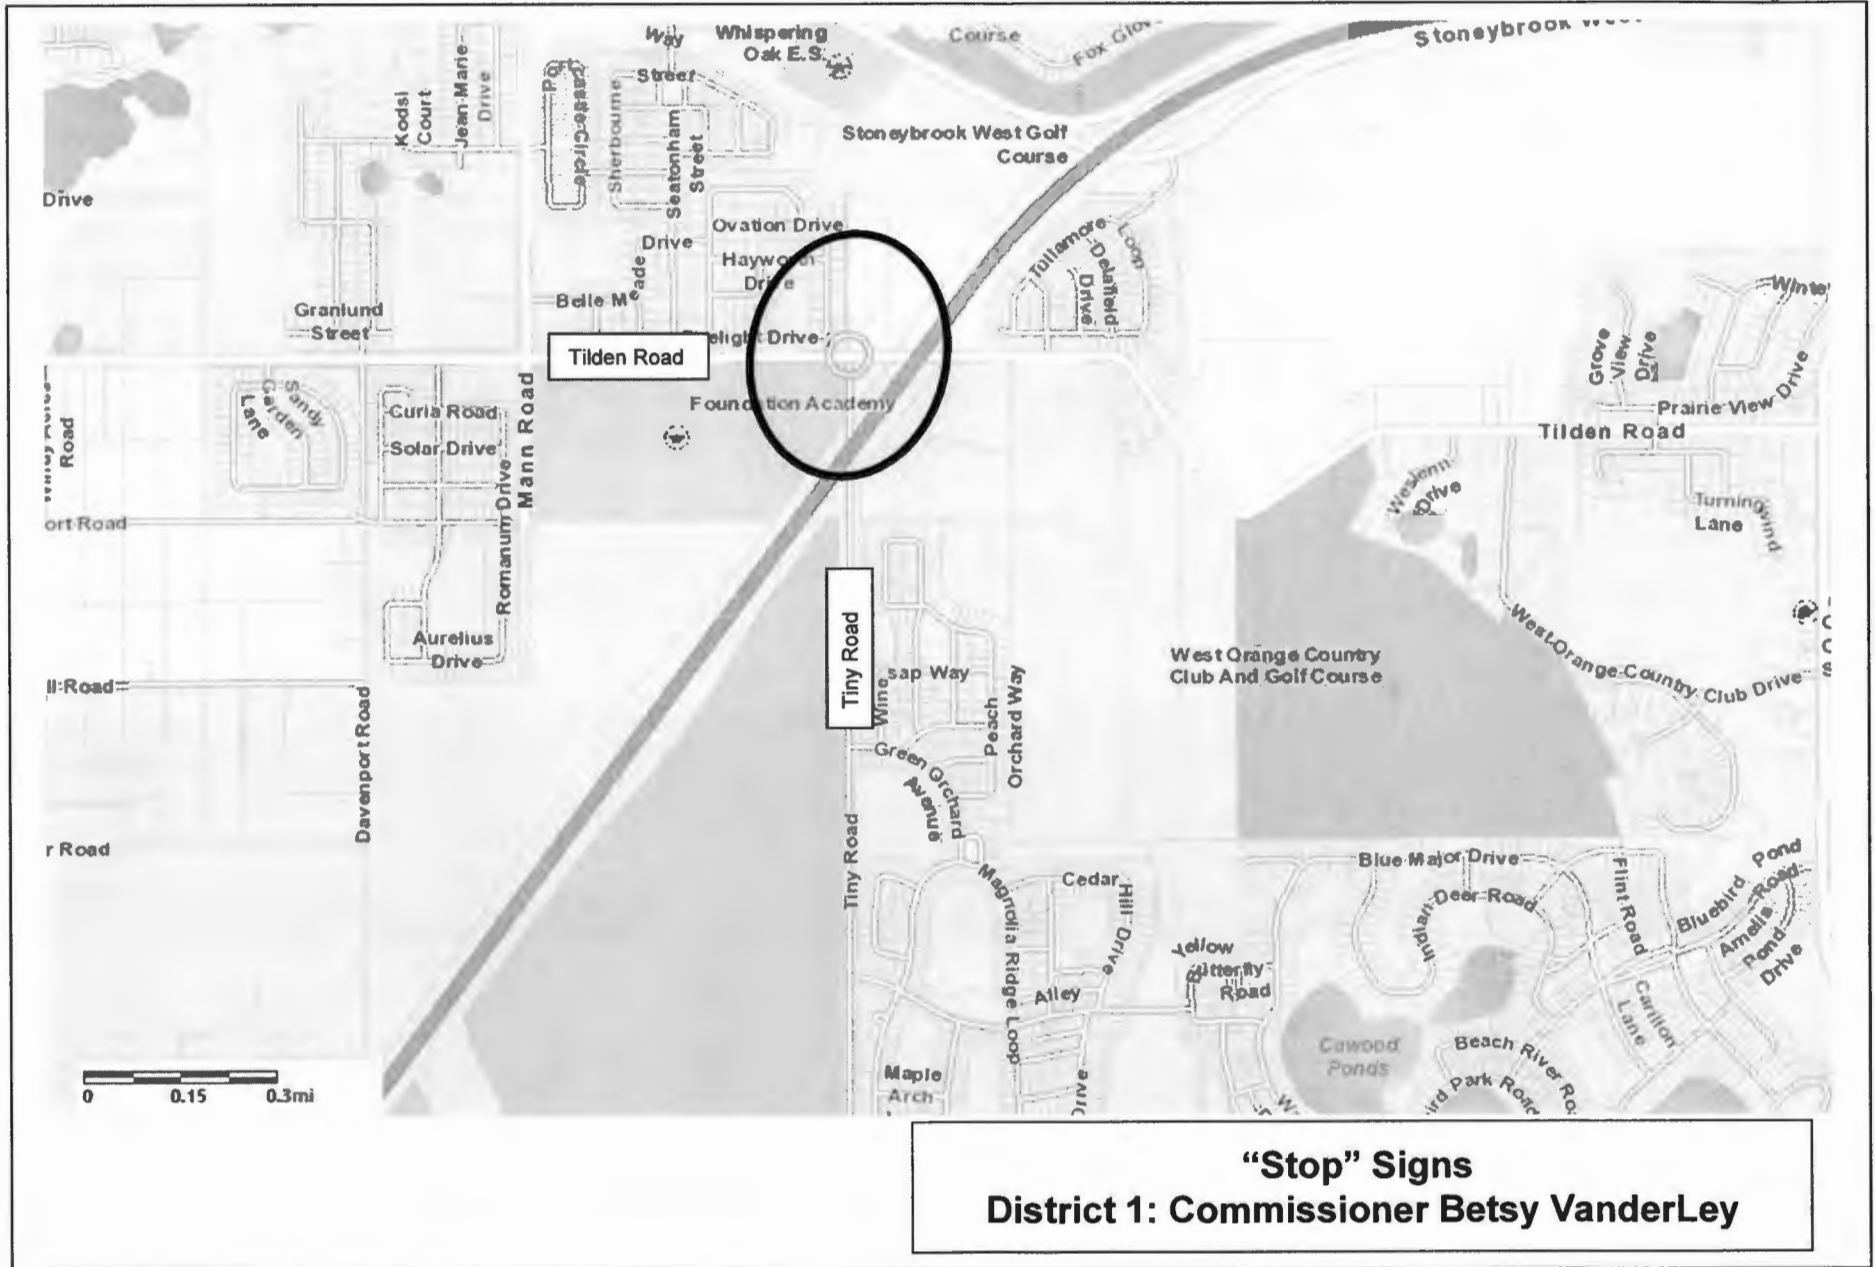

Action Requested: Approval of multi-way stop installation at Tilden Road and Tiny Road. District 1.
