Y15-1138-MA,

Amendment No. 3, Mosquito Control Insecticides

The active ingredient in the Duet Mini Tote is particularly effective against the mosquitoes that transmit Dengue and Chikungunya virus. Both are imminent disease threats in the county. The residual effect of this product allows a longer interval between treatments thereby saving labor and fuel costs. At this time there are no generic versions of the Duet Mini Tote and the manufacturer, MGK Insect Control Solution has designated Clarke Mosquito Control Products, Inc., as the sole exclusive United States distributor. The amendment is consistent with the prices established in the contract.
