REMARKS:

On August 22, 2014, the Procurement Division approved the standardization of Stryker Power Pro XT stretcher and associated components used for patient transport and care. Stryker Medical is the sole vendor authorized to sell and repair Stryker Power Pro XT stretcher and associated components in Central Florida. The standardized Stryker stretchers have proven reliable and safe for the high-level usage required by Fire Rescue. This system standardization allowed the ability to quickly move a stretcher from one transport to another without mounting challenges, means that service to the community remains uninterrupted.

This also includes Power Load fastener system, service plan, and extended warranty. Staff has determined the price is fair and reasonable based on previous purchases.
